

Number Line
Site Licensed DVD and PDF

In this intriguing lesson you'll enter the classroom of award-winning teacher, Brad Fulton, and see his students explore fractions, decimals, and percents with a simple and powerful activity based on the number line. Rich mathematical thinking ensues as students develop critical skills in ordering and comparing all three part-whole relationships. You'll see how Brad fosters the development of his students' number sense through effective questioning strategies. Then Brad will extend to include applications in an algebra class.

All DVD's are site licensed for affordability. Purchase only one copy for your entire school staff.

Approximate running time: 58 min. Handout contains nearly 200 fraction, decimal and percent cards.
