

## Team Roles

### Project Engineer

- Organize the lab work or your team.
- Make sure everyone understands directions.
- Lead by including the opinions and ideas of others.
- Make sure your team works cooperatively and smoothly.
- Bring issues to the teacher when necessary.

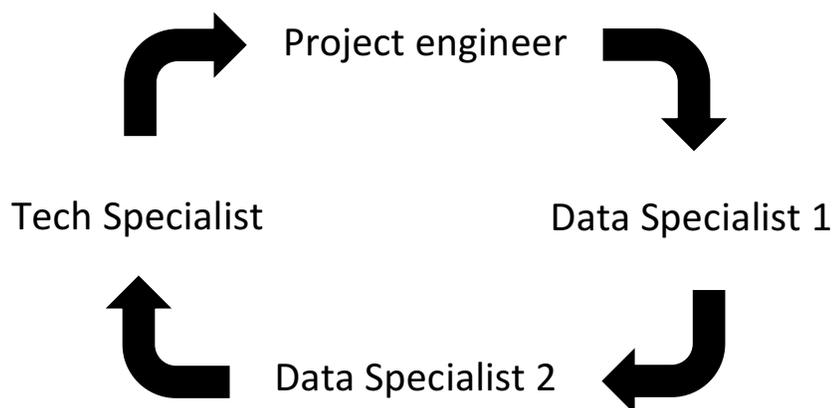

### Data Specialist

- Collect data using appropriate tools and units of measure.
- Check your work with the other data specialist.
- Attend to accuracy and detail.
- Submit your work to the Project Engineer and Tech Specialist.

### Tech Specialist

- Gather the data of the Data Specialists
- Put the results into a readable document for presentation and submission.
- Attend to detail and clarity in your presentation.
- Submit your work to the team for approval prior to submitting it to the teacher.

Rotate roles after each station:
