

Standards-Aligned Math Games That Motivate and Educate

What you will receive:

- Engaging and empowering math games that will hold your students' interest and build enthusiasm for math.
- Easily adaptable formats to fit different grades and settings.
- Customize the games to the needs of your students and curriculum.
- Teach rigorous state standards effectively without losing student interest.
- Increase computational accuracy and fluency.
- Great warm-up and whole period games will fit any time frame.
- Arithmetic, order of operations, fractions, geometry, algebra, and more!
- Great game management tips that keep all students involved and interested.
- Games work simultaneously with gifted and struggling students, special education, English language learners, and regular education too.
- Over 100 pages of complete lesson plans, homework masters, transparency masters, vocabulary lists, assessment ideas, teaching strategies, extension ideas and more.

What other teachers have said about this workshop:

"I can't wait for school to start so I can put these awesome ideas into practice. This will go a long way to motivate the unmotivated."

Pat Jared, middle school teacher

"I'll actually use every idea. Loved it!"

Caleb Crotzer, 6th grade

"A dynamic presenter!"

Stephanie Lee, 4th/5th grade

"Engaging students is fundamentally necessary, and Brad gives all teachers the tools to accomplish that."

Dawn Hatch, high school teacher

"I never thought seven hours in a conference would be so fun!"

Jennifer Bernier, 6th grade

"I'll use the games with my remediation. I thoroughly enjoyed the day."

Cindy Cardinale, math coordinator
